

ADITYA JAISWAL

Dehradun, India | ajaditya1908@gmail.com | +91-9458970585 | [GitHub](#) | [Linkedin](#)

Summary

Full-Stack Developer with strong experience in MERN stack, building web applications with authentication, real-time features, and RESTful APIs. Proficient in designing backend systems and integrating responsive UI, with hands-on project deployment experience.

Education

Bachelor's of Computer Application

2024-2027

The ICFAI University, Uttarakhand

CGPA: 9.38/10.00

Relevant Coursework: Data Structures & Algorithms, DBMS, Computer Networks, Operating System

Technical Skills

- **Languages:** C++, Python, JavaScript
- **Backend:** Node.js, Express.js, Flask
- **Frontend:** HTML5, CSS3, JS, React.js, Flutter
- **Database:** MySQL, MongoDB
- **Technologies/Tools:** GitHub, Git, Figma, JWT Authentication, Socket.IO

Certificates & Courses

- **The Complete Full Stack Web Development Bootcamp** by **Udemy**: Learned and Built full-stack web apps using MERN.
- **Flutter & Dart – The Complete Guide** – by **Udemy**: Developed cross-platform mobile applications with Flutter and Dart.
- **Cyber Security and Privacy** – by **NPTEL**: Gained foundational knowledge of cybersecurity and data privacy.

FreeLancing

Timed Quiz Application (Java)

- Developed a console-based timed quiz application in Java with multi-threaded input handling to enforce time-bound responses
- Implemented modular OOP design with dynamic question sets and a scoring system supporting positive, negative, and timeout-based evaluation

Projects

Multiplayer BingoGame Application | *React.js, Node.js, Express.js, MongoDB, Flutter, Firebase* | [🔗](#)

- Designed and developed a real-time multiplayer Bingo game supporting multiple rooms and concurrent players, ensuring smooth gameplay.
- Implemented WebSocket-based real-time communication to handle live game updates, player actions, and synchronization.
- Built scalable backend APIs for room creation, player management, authentication, and complete game lifecycle handling.

ApnaStay - Booking Platform | *Express.js, Node.js, MongoDB, Geolocation* | [🔗](#)

- Built a full-stack MERN-based accommodation platform with JWT authentication, role-based access, and RESTful API architecture
- Designed scalable backend using Express.js with modular controllers, middleware, and MongoDB schema optimization
- Integrated geolocation-based search, image upload, and dynamic filtering for enhanced user experience

AI-Powered Health Surveillance Ecosystem | *React, MongoDB, OpenAPI, Node.js, Express.js, Python* | [🔗](#)

- Engineered a cross-platform healthcare solution using React, Python and Node.js to centralize decentralized records and improve accessibility in medical sector.
- Built using OpenAI APIs for real-time disease surveillance, automated or analyzing and generating reports, and multilingual voice and multilingual chat assistance.
- Architected a secure environment using MongoDB, implementing end-to-end encryption for high-integrity data portability.

Achievements & Coding Profile

- Winner of Senior Year Coding Competition at college for outstanding problem-solving performance.
- 1st Runner-Up in College Hackathon (SIH Internal) contributing to team-based innovation and project development
- Solved 600+ DSA Problems on coding platforms like LeetCode, GeeksforGeeks and more strengthening logical thinking.
- Participated in 3 national level hackathons, gaining hands-on exposure to real-world tech challenges and competitive coding environments.
