PROFESSIONAL SUMMARY

Full-Stack and Mobile Developer (BCA, CGPA 9.38/10) with hands-on experience building and deploying production web and mobile applications using React.js, Node.js, MongoDB, and Flutter. Skilled in architecting scalable REST APIs, JWT authentication, and integrating AI/ML services (Groq API, OpenCV). Shipped 3 live applications with 150+ combined active users; solved 700+ DSA problems. Seeking a Full Stack or Mobile Developer role to contribute to real-world products.

TECHNICAL SKILLS

Languages: JavaScript, C++, Python, Dart, C

Frontend & Mobile: React.js, Flutter, HTML5, CSS3, Responsive Design

Backend & APIs: Node.js, Express.js, Flask, RESTful APIs, WebSockets, JWT Authentication, Microservices

Databases: MongoDB, MySQL, PostgreSQL, Schema Design, Query Optimization

Tools & DevOps: Git, GitHub, Docker, CI/CD (basic), Firebase, Figma, Agile/Scrum, NumPy, Pandas

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Unit Testing (basic)

WORK EXPERIENCE

Full Stack Developer – Freelance

Express.js, Node.js, MongoDB, React.js | June 2026 – Present | Remote

- Architected and deployed a production-ready laundry management platform managing a 7-stage order lifecycle, implementing role-based dashboards and JWT-based authentication.
- Engineered backend pipelines in Node.js/MongoDB for real-time Tag ID tracking and automated email alerts.

Live Demo: laundry-shop.vercel.app/

AI for Sustainability Virtual Internship – 1M1B and AICTE

May 2026 – June 2026 | Remote

- Leveraged AI/ML fundamentals, LLMs, and RAG frameworks to evaluate and design sustainability-focused AI applications.
- Engineered project-based solutions using IBM SkillsBuild resources, focusing on deployment of emerging AI technologies.

PROJECTS

Monakh – AI Interview Assistant | github.com/aj-aditya19/AI-Interview-Assistant | ai-interview-assistant-ecru-gamma.vercel.app/

Express.js, MongoDB, React.js, Python, OpenCV, Groq API

- Architected a real-time voice and video interview simulator orchestrating multi-language microservices (Node.js backend, Python core processing) for simultaneous media pipelines.
- Integrated Groq API, Whisper Speech-to-Text, and OpenCV for asynchronous user evaluation pipelines, optimizing real-time facial movement tracking to sub-150ms processing latency.
- Optimized MongoDB indexing and schema design, reducing query execution time by 35% during multi-stage data retrieval.

MyVault – Personal Productivity App | github.com/aj-aditya19/MyVault

Flutter, Dart, Encryption (AES-256)

- Architected a local-first, zero-knowledge productivity system using AES-256 encryption, distributing a standalone Android APK to 50+ active users.
- Engineered a high-performance local data storage layer with optimized JSON serialization and atomic file-write mechanisms to prevent data corruption during crashes.
- Containerized the multi-platform build environment using Docker, creating reproducible pipelines across Linux and Windows.

Multiplayer Bingo | github.com/aj-aditya19/BingoGame | bingogame-web-t73z.vercel.app/

React.js, Node.js, Express.js, MongoDB, Flutter, Firebase

- Developed an asynchronous, event-driven multiplayer gaming platform using bidirectional WebSocket channels, deployed to production supporting 100+ active users.
- Optimized network synchronization, reducing end-to-end gameplay latency by 25% versus traditional HTTP polling while maintaining real-time state consistency under concurrent load.

EDUCATION

Bachelor of Computer Application (BCA)

The ICFAI University, Uttarakhand | CGPA: 9.38/10.00 | Expected Graduation: June 2027

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks, Operating Systems

ACHIEVEMENTS & CERTIFICATIONS

- Solved 700+ Data Structures & Algorithms problems on LeetCode, GeeksforGeeks, and other platforms.
- 1st Runner-Up, College Hackathon (SIH Internal) – team-based innovation and project development.
- Winner, Senior Year Coding Competition – college-level problem-solving performance.
- Competed in 3 National-Level Hackathons building scalable prototypes under time constraints.

Certifications: The Complete Full Stack Web Development Bootcamp (Udemy, Aug 2025); Cyber Security and Privacy (NPTEL, Jul–Oct 2025); Flutter & Dart – The Complete Guide (Udemy, May 2026).
